

MAY – Newsletter

Hey all,

We hope you are enjoying the amazing weather that we are having and hope you will all agree how lovely our campus looks in the sunshine!

We want to first invite you to three fantastic events that we have on campus, please sign up and pop along to see us.

Second Public Consultation on Babraham Research Campus' Roadmap for the Future

As you may know, we have been exploring the future of Babraham Research Campus for some time. Following our initial public consultation, we have taken on board the feedback shared and have been working to shape a roadmap for the Campus that reflects both our aspirations and those of the local community.

We are now preparing to launch the second round of public consultation and would love to hear from you again. Your views remain an important part of this process, and we are keen to learn what matters most to you as we refine our proposals.

Where: The Restaurant, The Cambridge Building

When: 22nd May, 10am - 2pm

At this event, you will have the opportunity to:

- Learn more about our updated thinking and proposals.
- Share your views and ideas directly with the project team.
- Find out how we plan to open Campus facilities for local residents.

Drop in any time between 10am and 2pm to meet the project team and share your views!

Cambridge Wide Open Day

Join us on **11th June** for a day packed with insightful discussions, immersive experiences, and vibrant community engagement. Whether you're passionate about sustainability, entrepreneurship, or simply looking to enjoy the campus atmosphere, there's something for everyone! Join us for:

- Sustainability talk
- Campus & innovation tour
- Summer market with local businesses, including the Gog Farm Shop and Kelly's Cake Kitchen!
- Games on the lawn and the bar will be open
- Commercialisation Success: Triple Chasm Workshop

With so much happening, 11th June is a fantastic opportunity to engage with campus life, network with like-minded individuals, and celebrate the intersection of sustainability, innovation, and entrepreneurship. We look forward to welcoming you on Campus!

Babraham Estate, Wood Yard Open Day

Saturday 7th June 10:00-14:00, Access via Rowley Lane, off Babraham High Street.

We're excited to invite you to the upcoming Wood Yard Open Day, a fantastic opportunity to engage with our Ecology and Land Management team!

Don't miss the end-of-season sale on:

10kg bags of firewood

5kg bags of kindling

10kg bags of woodchip

Hazel beanpoles, stakes, canes and pea sticks

(cash sale only)

Come along and connect with the team while exploring the efforts that make our Estate a thriving space!

For more information, please contact Matt (matt.antrobus@babraham.co.uk)

New Initiatives on Campus

Plastic Cups

As we continue to look for ways to improve sustainability across the campus, we have just changed all our plastic cups in the canteen over to glass. This is not only cost effective but is one of many steps we would like to take to eliminate all plastic from the campus.

Where Green Travel Meets Green Design

At Babraham Research Campus, we're all about supporting sustainable choices — and that includes *how* people get to work.

Our new B960 development includes a secure cycle store, encouraging active travel 🚲 — but we didn't stop there. The building is also home to a **living wall**, bringing biodiversity benefits right into our everyday spaces.

-  The living wall helps improve air quality
-  Supports pollinators and insect life
-  Adds natural beauty to the daily commute

It's a small space doing big things for the environment — and just one example of how we're weaving nature into every part of campus life.

News items

Alpers-Huttenlocher Syndrome (AHS) is a devastating disease that affects children, causing seizures and liver failure. A mitochondrial disorder it leads to the classic presentation of the disease between 2-4 years of age and sadly there are no effective treatments for this disease.

Campus company Stemnovate is currently looking for individuals to participate in research study for developing new treatments.

If you are a parent or family member of a patient with Alpers-Huttenlocher Syndrome, please get in touch at info@Stemnovate.co.uk

We hope you have enjoyed this update from all of us at the Babraham Research Campus.

Be sure to pop back next month for lots more!

If you have anything specific that you would like to hear more about, feel free to drop us an email at Nichola.Jones@Babraham.co.uk and we will try to include it in the next month's update.
